

# Statement of Results

Name

DUY HUYNH

STAT ID:

24569942

Date of Birth

14/01/2006

UCAS ID:

1755160366

## Multiple Choice

Test Date

14/04/2024

	Scale Score	Percentile Rank
Verbal Reasoning	145	98
Quantitative Reasoning	189	100
Overall Score	167	100

This statement must not be altered. ACER will provide universities with a results verification service.

## FURTHER INFORMATION

- Q Have I passed or failed?**

**A** There is no 'pass' or 'fail' for STAT. Universities set STAT cut-off scores for each course. The minimum STAT scores required may vary from year to year. (Note: The STAT Office cannot give information regarding cut-off scores).
- Q Do my STAT scores show the number of questions I answered correctly?**

**A** No. The number of questions you answered correctly has been scaled to obtain your STAT score for each section.
- Q What is the maximum possible STAT score?**

**A** The maximum possible STAT score can differ from one section of the test to another. STAT scores are usually reported on a range between 100 and 200.
- Q Why are my scores scaled?**

**A** STAT tests can differ slightly in difficulty from year to year. Scores are adjusted (scaled) to take account of year-to-year differences in test difficulty. Each section of STAT measures a separate attribute or skill and is reported on its own scale.
- Q How is my Overall STAT score calculated?**

**A** The STAT Overall score is the unweighted average of the two multiple-choice section scores.
- Q What does a Percentile Rank mean?**

**A** A percentile rank is given to enable you to gauge your performance relative to all others who took the test in the same year. A higher percentile figure indicates higher performance and vice versa.

Questions about offers of places should be directed to individual tertiary institutions, not to the STAT Office.  
STAT results are valid for 3 years from the test date.
